

## CALL FOR APPLICATIONS

### Trinational Summer School

#### „Experimenting with transdisciplinary research - using the example of climate adaptation of cities and municipalities“

25-29 September 2023 at the [Studienhaus Wiesneck](#) near Freiburg (Germany)

---

#### What is it about?

The trinational summer school offers **20 PhD and master students from various disciplines** the opportunity to learn **interactively** about **innovative formats and methods of transdisciplinary research**.

The sustainable transformation of our society does not only require the production of knowledge and the development of scientific solutions. In order to implement scientific findings successfully, it is necessary to deal with the social framework conditions. This requires close **cooperation between science and society**. The **subject of transdisciplinary research** is to design and structure this cooperation in a scientific and practice-oriented way.

The summer school offers the opportunity to discover and try out different transdisciplinary formats and methods based on a **case study on climate adaptation of a town district of Emmendingen (north of Freiburg in Germany)**. As the trinational Upper Rhine region is particularly affected by heat and as even higher temperatures and more frequent and longer heat periods are expected in the future, cities and municipalities are called upon to quickly develop adaptation strategies and measures. The students will tackle this issue **concretely and in direct cooperation with the City of Emmendingen**.

#### Who can participate?

**20 PhD and master students** from the universities and graduate schools of the **Eucor area** (Basel, Freiburg, Colmar/Mulhouse, Straßburg and Karlsruhe) **from all natural sciences, social sciences and humanities** who are interested in transdisciplinary research and would like to acquire expertise in this field.

**No previous knowledge is required.**

## Application

Please send your application in **English (Curriculum Vitae, letter of intent and a brief description of your doctoral project)** by **30.06.2023** in electronic form to [td-summerschool@eucor-uni.org](mailto:td-summerschool@eucor-uni.org).

The main working language will be **English**, and **German or/and French** is required. The **selection criteria** are the **composition of an international and interdisciplinary group** as well as the **motivation** of the candidates.

A **selection committee** composed of representatives from the partner organisations will meet at the beginning of July. You will hear from us **by the end of July 2023**, whether your application was successful or not.

## Information & Contact

The **participation fee is 140 €** per participant and **travel costs** will be covered by the participants themselves (arrival at the Studienhaus Wiesneck on 25.09.2023; departure from Emmendingen on 29.09.2023).

For more information about the stakeholders, the programme and the organisation, please visit [the Eucor website](#).

For further information, please contact **Dr. Regina Rhodius or Mathilde Colin** at [td-summerschool@eucor-uni.org](mailto:td-summerschool@eucor-uni.org).

## Special thanks to

For the conception and the organisation
